\*The City of Belleview does not recommend or vouch for any particular company. The City of Belleview does not know prices or schedule services. It is the sole responsibility of the owners of backflow prevention assemblies (BPAs) to seek out testers and have their BPAs tested annually (non-residential) or biennially (residential). All testing is at the expense of the owner. All companies on this list have provided the City of Belleview with up-to-date tester certifications and equipment calibrations; however, it is the owner's responsibility to ensure all testers have the required certifications. Companies that do not appear on this list may be used; however, their credentials and equipment calibrations must be verified by the City of Belleview. The City of Belleview has the right to reject questionable calibration reports and require that retesting be performed.
